

AHMED HASSAN

GROWTH & BUSINESS DEVELOPMENT MANAGER | COMMERCIAL STRATEGY | SALES OPERATIONS |
RENEWABLE ENERGY

Egypt | +20 101 879 7298 | a7md07san@gmail.com | linkedin.com/in/ahmedhassan-growth

PROFESSIONAL SUMMARY

Growth and business development professional with progressive experience across consultative sales, inventory and branch operations, and renewable-energy growth. Hands-on experience building commercial infrastructure including growth roadmaps, CRM and pipeline systems, B2B market intelligence, sales operating models, KPI and management-reporting frameworks, customer-success workflows, recurring-service offerings, and digital lead-generation assets. Combines commercial strategy, structured execution, data-driven decision support, and sales enablement to turn growth priorities into repeatable operating systems.

CORE COMPETENCIES

Business Development | Growth Strategy | Commercial Strategy | Go-to-Market | B2B Prospecting | Market & Account Mapping | CRM & Pipeline Design | Sales Operations | Revenue Operations | KPI & Reporting Systems | Customer Success | Retention & Referrals | Service Development | Sales Enablement | Process Improvement | Cross-Functional Coordination

PROFESSIONAL EXPERIENCE

Growth Manager | Innovation for Solar System | 2025 - Present

Egypt

- Developed a two-year strategic and commercial growth roadmap and translated it into 90-day and monthly execution plans with defined owners, KPIs, milestones, review gates, and escalation rules.
- Designed a 90-day execution operating system across 13 structured sprints, establishing daily and weekly operating rhythms, accountability, KPI reviews, CRM updates, management reporting, and defined completion criteria.
- Designed and implemented the company's CRM and commercial-data framework to centralize customers, target accounts, opportunities, pipeline stages, owners, next actions, follow-up dates, and loss reasons.
- Built a B2B market-intelligence and account-prioritization database for Beni Suef and Fayoum covering 47 mapped local/regional market entries, dual scoring for solar relevance and B2B purchase potential, competitor analysis, reseller mapping, and a prioritized 20-account outreach queue.
- Developed a three-tier annual maintenance service system with service scope, SLA levels, response priorities, customer journey, commercial proposal, technical reporting, payment structure, and annual maintenance agreement to support recurring revenue and retention.
- Built sales and field-development workflows covering qualification, call and visit scripts, proposal follow-up, customer visits, B2B partnerships, account development, and customer-success/referral activities.
- Designed and developed the company's corporate website across frontend and backend, including lead-generation journeys, a customer-facing solar estimation calculator, training-course pages, and certificate verification by trainee ID.
- Currently delivers practical solar-sales training and supports the development, assessment, and selection of solar-aware trainees for the company's sales talent pipeline.
- Introduced structured management reporting, inventory visibility across two warehouse locations, and a documented accounting workflow to strengthen operational control and decision support.

Progressive Roles: Sales -> Inventory Management -> Branch Manager | Kahla Optical Company | 2021 - 2025

New Damietta, Egypt

- Delivered consultative sales by identifying customer needs, recommending appropriate optical products, handling objections, following up with customers, and closing sales in a target-driven retail environment.
- Managed contact-lens stock availability and inventory coordination to support accurate replenishment, product availability, and day-to-day operational continuity.
- Progressed to branch-management responsibility, overseeing daily operations, customer service, sales coordination, inventory availability, and issue resolution.

SELECTED STRATEGIC & COMMERCIAL PROJECTS

Solar PV Engineering, Costing & Quotation System - Microsoft Excel

- Built a 40-sheet integrated Excel system linking solar design inputs, BOQ quantities, component pricing, direct and indirect costs, risk allowance, discounts, VAT, sales commissions, gross/net profitability, customer quotation outputs, dashboards, scenario comparison, and validation tests.
- Developed project financial-analysis logic covering annual cash flows, payback period, NPV, IRR, LCOE, cost/selling price per kWp, and engineering/commercial decision support.

Strategic & Commercial Growth Playbook

- Created an executive growth framework connecting business diagnosis with sales, CRM, marketing, customer success, digital transformation, SOPs, governance, KPI architecture, performance management, and execution planning.

B2B Market Intelligence & Account Prioritization System

- Structured a market-mapping and lead-prioritization model for Beni Suef and Fayoum using verified/local market data, dual scoring, opportunity tiers, competitor intelligence, dealer/reseller segmentation, contact strategy, and field-verification workflows.

Executive Management & KPI Playbooks

- Developed executive decision-support frameworks combining daily dashboards, weekly performance reviews, KPI scorecards, risk monitoring, escalation rules, priority management, and structured management follow-up.

TECHNICAL & BUSINESS TOOLS

Excel & Analytics: Advanced Microsoft Excel, commercial/financial models, dashboards, scenario analysis, lookup-driven databases, structured validation and test cases

Commercial Systems: CRM systems & dashboards, pipeline design, KPI/reporting systems, B2B account mapping, LinkedIn Sales Navigator
